

Technical Data Sheet

For Neteko Bubble Paper

Bubble Paper, produced by GROPAK Ltd, sells by the name of Neteko.

Product Purpose:

Protection for delicate objects during shipment. Perfect for wrapping around products and securing them. Suitable for filling up empty space in transport boxes to protect items from moving around and being damaged.

Available in Rolls:

Width of the roll (cm): 20, 30, 40, 50 and 60

Lengths of the beam (m): 20, 50 and 100

The product is also available in sheets.

Width of the sheet (cm): 10 - 60

Length of the sheet (cm): 20 - 100

Bubble Paper raw material:

- Kraft Paper
- Weight: 70 g/m²
- Color is Brown

Processing Method of the Ingredient:

The rolls of paper are cut into specific desirable sizes. Subsequently it is processed through a machine designed to press the paper into a designed shape creating "bubbles" on the paper. Afterwards, it is spun onto a roll or cut into sheets, and placed inside a prepared cardboard box with a label.

Storage instructions:

Store in a dry place, safe from water and high humidity. This will preserve this product longer and keep it from becoming damaged. The outside cardboard protects the paper inside from damage in transport, but it's not waterproof.

Recycling:

The product is 100% paper, so it should be recycled with paper.
